

Viorel Tomita

Front-End Developer

[● GitHub](#)[● Code Wars 7kyu](#)[● Stack Overflow](#)[● LinkedIn](#)

Summary

I design websites that load in less than a second. Following my content and optimization advice, my most recent client crushed his competition and generated new leads. What is your most daunting problem? Should we talk about it?

FRONT-END

- React
- React Hooks
- Redux

- Remix
- JavaScript
- HTML 5
- TypeScript

- UI Design
- Animation
- UX
- Sass

- UI Design
- Jest
- Figma
- Photoshop

BACK-END

- NextJS
- Firebase

- REST
- NodeJS
- Bash

- Nginx
- Git
- Pug

- GitHub
- Linux
- Express

WORK EXPERIENCE

Junior Front End Developer - (WoW DoP)

08/2021 – Present

By bringing down the website's loading time to under 400 milliseconds, I was able to lower the bounce rate and boost the site's search engine optimisation. As a result, Google's page speed algorithm recognised significant improvements to the site's previous score (40/100) and awarded it a perfect score of 100. The use of SASS and PUG to construct modular, reusable components makes the project not only faster and more optimised, but also simpler to update. The client was so pleased with the outcome that they insisted on showcasing our logo on their website, and as a result, we were awarded a new project.

Working as a Junior Front End Developer in the WoW DoP community, I have implemented extremely fast responsive components for the projects using React and JavaScript, far surpassing the expectations of the client. Every day, I use modern web development tools like HTML, CSS, and JavaScript to build user interfaces (UI) with the future in mind.

EDUCATION

Danubius University Galati**Galati, RO****International Relations and European Studies****10/2009 – 07/2012****SF. Maria Highschool****Galati, Romania****I have graduated Computer Science****11/2001 – 05/2005**
